Medical Emergencies in the Dental Office – Medical Emergencies in Life! (LECTURE)

As health professionals we must be increasingly aware that we are treating an aging and pharmacologically drug dependent and ambulatory population. How can we be expected to respond/react to life threatening situations when they “never occur?” Simplicity! Practical equipment adjuncts, a few good drugs, “red flags” of predisposing medical conditions, vasoconstrictor interactions and local anesthetic overdoses will be assessed. The syncope algorithm is universally applicable to initially treating ANY and ALL emergencies. The team approach is emphasized. Morbidity/mortality case reports, anecdotes including situations encountered in over 40 years in dentistry will cover dental office, family, neighborhood, shopping center and sports experiences.

At the conclusion of this course, the participant will be able to:

- Appreciate the differences between true emergencies, urgencies, annoyances and non-events
- Comprehend the pharmacology of a very few drugs including oxygen and make an emergency kit
- Consider the physiological differences between the adult, the child and the senior citizen
- Assess Case Reports, in the dental office and in day-to-day life

No prior level of skill, knowledge, or experience is required for participation in this course.

Travel Smarter-Use these Tricks to Plan Your Next Trip (LECTURE)

Learn some easy tips to help make your next vacation stress free—from seat assignments to visas to best local currency options. Access airport lounges, utilize elite benefits at your favorite hotel chain, save money on rental cars, and view some awesome award redemptions—so you can really relax and recharge.

At the conclusion of this course, the participant will be able to:

- Learn multiple methods to access airport lounges while traveling domestically and internationally to help make airports and flight delays less stressful
- Understand how to make sure all of your travelers are sitting together, and receiving the most miles for their flights
- Explore some fun and creative award travel options, and understand the best options for local currency

No prior level of skill, knowledge, or experience is required for participation in this course.
